- DUNS Number: 089950471**

Experience

Naval Air Warfare Station

The Naval Air Warfare Station in China Lake, CA, receives hundreds of phone calls each day that must be properly fielded and directed. TDEC provides telephone directory assistance and related information, as well as assist with external calls including DSN and international.

Centers for Medicare and Medicaid Services

TDEC receives thousands of application-related documents submitted under the Affordable Care Act. The Centers for Medicare and Medicaid Services (CMS) requires eligibility to be confirmed and applications processed quickly and effectively. Onsite at one of the CMS locations, TDEC creates accounts and reviews the data for completeness and eligibility. Documents are then processed for approval.

Drug Enforcement Agency

The Drug Enforcement Agency needs timely and accurate investigative information in order to fulfill its mission to combat the production and distribution of illegal drugs. TDEC provided document support services to enter information into agency systems for rapid use by its agents and investigators.

U.S. Citizenship and Immigration

TDEC operates and manages U.S. Citizenship and Immigration field offices in support of the prime contractor, handling the fluctuating volumes of immigration applications and review times. TDEC exceeds the contract performance requirements established and consistently provides superior service, decreasing turnaround times.

Office of Personnel Management

The Office of Personnel Management must screen a large volume of security applications each week. Incomplete applications slow processing times and successful adjudications. TDEC provides OPM with administrative services to support personnel security operations in Boyers, PA, processing submissions, identifying incomplete information and conducting follow-up with applicants.

Department of Labor

TDEC staff, located onsite at Department of Labor centers, receive thousands of workers' compensation and other wage-related claims each year. Following standard operating procedures, claims are quickly digitized and validated for processing within 24-48 hours of receipt.

Nuclear Regulatory Commission

Nuclear Regulatory Commission add thousands of documents to its digital repository each year for regulatory review and research. TDEC receives documents in paper, electronic form and microfiche. Each is reviewed for completeness and sensitivity and whether it should be added to the repository. Approved documents are then processed and organized into libraries and collections.
